

RSHE Consultation Response Parental Feedback 2026

After consulting with parents as part of our Relationship, Sex and Health Education (RSHE) , we received the following feedback. This feedback was from all parents from EYFS to Year 6.

As a result of the consultation, we have reviewed our RSHE policy and made a number of changes.

Concern	Action
1. Our children should not be taught anatomical terms (penis and vulva) in EYFS as the children are too young for this	We have changed the curriculum so that the correct anatomical terms are introduced from year 1 and will be reviewed.
2. I don't think Year 6 should not be watching an animated video showing sex- it is not appropriate!!	We will replace animated videos with static animated images instead
3. Having looked at the RSHE curriculum, I feel it is relevant for the times we are living in.	
4. My child is too young to learn about Relationship and Sex	Curriculum will be age appropriate and will be taught in the Summer term, giving the children time to mature throughout the school year.
5. I feel the school has thought carefully about what topics are taught throughout the years especially AI and being safe online.	We will continue to review this, alongside the online safety and our safeguarding procedures.
6. Who will teach my child?	Class teachers to deliver the curriculum as they have developed a trusted relationship
